

REISS Trailo[®]
All round genius with REISS Schiene[®]

We know how to create offices.

A table that changes. **You.**

We look back on 140 years of experience in reinventing ourselves and the world of work. Our REISS Trailo® is the next logical step: innovative rail REISS Schiene® for mobile work surfaces and accessories, homely materials and individual design.

TRAILO

Redefining functionality at the workplace

The REISS Schiene® is the centrepiece of the design and the conceptual basis for the modularity and extended functionality of REISS Trailo®. It features a circumferential metal profile under the table top, which both contributes to the frame statics and ensures flexibility in the horizontal direction. This allows the table to be extended in many ways. A trolley, which can be stored in the rail, serves as a support element for portable add-on elements and accessories.

Customise your workspaces

Different frame types, from the four-legged table to the height-adjustable T-legged table, table tops in various shapes and sizes, as well as a wide selection of colours and décors offer you creative freedom in setting up functional yet incredibly customised workspaces.

Extend the functionality of workspaces

Movement takes on a whole new dimension with REISS Trailo®. Mobile add-on elements and accessories can be easily pushed into position on the REISS Schiene® and extend your workspace both horizontally and vertically.

Flexible systems

With its modularity, REISS Trailo® provides innumerable options for setting up workspaces. Thanks to REISS Schiene®, flexibility and mobility are no longer limited to height adjustment. They also extend to the horizontal level, creating new options to extend your personal workspace. In addition, REISS Trailo® offers ergonomics, more function and countless design options using different materials and add-ons.

Make workplaces homely with fleece

The cable outlets, modesty panels and cable ducts made of Formfleece emphasise the modern product design. In addition, the polyester fibre fleece provides maximum dimensional stability, temperature resistance, and a pleasant felt feel.

Showroom

With a wide range of variants and functional features, colours and materials, REISS Trailo® allows you to customise your workplace and, at the same time, ensures a harmonious concept for the most diverse office spaces.

HEIGHT ADJUSTMENT RANGES:

- Fixed height in the sitting range and as a high table for the central zones of the office, 740 mm and 1,100 mm respectively
- Height-adjustable in the sitting range, 650–850 mm
- Motorised height-adjustable in the stand-sit range 650–1,250 mm
- Lift quick adjustment for single-column desks, 680–1,120 mm

TRAILO

Changes the way you **work.**

REISS Trailo® gives workspaces a whole new look and feel.
The harmonious shapes of the work desks create a homely ambience
and the smart accessory solutions make working a pleasure.

TRAILO

Individual development.

The REISS Trailo® desks are available as a 4-legged variant with three different leg shapes or as a T-legged variant. Thus you can set up a table that suits you – as REISS Trailo® S with four round legs made of genuine wood, in the R variant with four legs made of round tubes, with the elegant D leg or with a T leg having two leg extensions. The REISS Schiene® allows you, for example, to attach an acoustic baffle or a tray for placing documents to the table and thus expand your workspace. The trick is to just push the acoustic baffle or the tray to the position where it is needed at the moment.

And if you want to experience this new work environment at home as well, you will certainly find your favourite table also as a home office variant.

AT A GLANCE

- Different frame legs: REISS Trailo® S/D/R/T
- REISS Trailo® T optionally with motorised height adjustment
- Wide range of accessories and add-ons, both fixed and mobile
- Optionally with sliding table top
- Max. load capacity: T-legged desk – 100 kg, four-legged desk – 80 kg

The tray provides additional storage space on the table and can be easily moved around the table using the trolley.

Fixed height
740 mm

Height adjustable
650–850 mm

Motorised height adjustment
(REISS Trailo® T only)
650–1,250 mm

TRAILO

Opens new perspectives.

The high tables REISS Trailo® high are highly versatile. As separate meeting points in open-plan offices, they allow you and your colleagues to have spontaneous stand-up meetings and to exchange ideas in a relaxed atmosphere. At the same time, they also serve as perfect temporary workspaces that spark new creativity.

TRAILO

Communication at eye level.

A comfortable position and a new perspective create space for creative brainstorming, new approaches and open communication.

REISS Trailo® high blends perfectly into the office design and comes with various electrification options. This makes it easy to connect laptops or meeting equipment to the table. You can also use a stand-alone acoustic baffle to define individual zones and set up an individual workplace if you want to work in a different position.

AT A GLANCE

- l Different frame legs: REISS Trailo® S/D
- l Ergonomic foot rest
- l Electrification options with sockets, USB ports or Qi charger
- l Optional stand-alone acoustic baffle
- l Max. load capacity: 50 kg

Fixed height
1,100 mm

You can position the acoustic baffle the way you need it. And if you want to exchange ideas in a large group, you can just take it off the table.

TRAILO

Pushes your **teamwork.**

With the REISS Trailo® bench solutions you can create customised workspaces for up to six colleagues to work together on projects. Combine fixed and flexible workstations so that colleagues who travel a lot or work in a home office can also join you in the office.

If you basically work flexibly from anywhere, then the bench solutions provide the option of setting up the workspace in a minimalist way for joint office days with creative exchange of ideas.

TRAILO

One for all.

The team workstations of the REISS Trailo® bench solutions promote working together and at the same time provide options for separation and isolation. Acoustic baffles can be used to create individual spaces and creative zones. Acoustic baffle add-ons help organise the workplace. And well laid out electrical sockets make it easier to power your devices.

AT A GLANCE

- | Different frame legs: REISS Trailo® S/D/R
- | With sliding table tops
- | Optional extension via acoustic baffle with organisational aids
- | Electrification option with sockets, USB ports or Qi charger
- | Max. load capacity: 80 kg per table top

You can also use the multi-purpose clamp to conveniently hang your bag or backpack. This keeps them close at hand and they do not have to be placed on the floor.

Fixed height
740 mm

Improves your **work-life balance.**

REISS Trailo® connects your home with your work without being intrusive. Thanks to the homely design, modern décors and colours, your workstation integrates perfectly into your living space and makes working a pleasure.

TRAILO

Flexible to use.

REISS Trailo® home fits into the separate study or into the working corner of the living room and creates a pleasant working atmosphere. REISS Trailo® desks also blend seamlessly into your living space. Whether you are looking for a small variant requiring little space or for a permanent standard-compliant workstation, you will find your table here.

AT A GLANCE

- | Different frame legs: REISS Trailo® S/D/R/T desks
- | REISS Trailo® S home with genuine wooden legs
- | Optionally with sliding table tops
- | Optionally with electrification
- | Optional extension via acoustic baffles with organisational aids
- | Max. load capacity: 80 kg

The acoustic baffle can be permanently attached to the table or flexibly positioned using the trolley. The multibox or the headset holder make your desk look neat and well-organised.

Are you looking for a design that can be used for both work and living? With REISS Trailo® S, you'll find a variety of tables in different sizes that allow you to work ergonomically and provide a place to spend time together with your family or friends at a fancy dining room table.

Fixed height
740 mm

TRAILO

Optimises your **communication.**

Here you can concentrate on what's important. With an attractive design and a wide range of add-on and combination options, the REISS Trailo® meeting tables offer you the perfect place for constructive meetings, discussions, or training sessions.

TRAILO

Open for discussions.

With its diverse sizes and shapes, you can use REISS Trailo® to set up communication spaces for the most varied requirements. Its homely shapes promote informal discussions and creative exchange of ideas. Various electrification options ensure adequate power supply for long meetings. And you can connect the necessary meeting equipment directly over the table.

AT A GLANCE

- | Different frame legs: REISS Trailo® S/D/R/T
- | Electrification options with sockets, USB ports or Qi charger
- | Optional stand-alone acoustic baffle
- | Max. load capacity: T-legged table – 100 kg, four-legged table – 80 kg

Neat and well-organised – the centrally positioned cable duct makes it extremely easy to route the cables for supplying power to the REISS Trailo® meeting tables. The cable duct is suspended using two wire ropes and thus provides quick access to the connections at all times.

ELECTRIFICATION OPTIONS FOR REISS TRAILO®

- | Cable ducts, cable outlets
- | EVOLine One and Circle 80–230 V and USB A/C
- | EVOLine Qi for wireless charging
- | Electrical modules with 230 V connections and USB A/C

Fixed height
740 mm

Height adjustable
650–850 mm

Motorised height adjustment
(REISS Trailo® T only)
650–1,250 mm

TRAILO

Defines your **perspective.**

REISS Trailo® One is a fully-fledged table and a perfect complement to all other REISS Trailo® models at the same time. Without the REISS Schiene® feature it is almost an outsider, but with its unusual shapes it fits perfectly into the REISS Trailo® work environment. The slightly different one for your home office, for your meeting corner, the lounge, or as a temporary workstation.

Convincing in every form.

With its curved design in the shape of a heart and kidney, REISS Trailo® One convinces in various situations. Thanks to its compact size, it can be integrated in many places when designing the interior. With a castor in the base, it is easy to move and flexible to use.

AT A GLANCE

- | Single column table with round column (Ø 70 mm)
- | Optionally with integrated electrification
- | With castor for easy positioning in the room
- | Max. load capacity: 15 kg

Fixed height
740 mm

Height adjustable
650–850 mm

Lift quick adjustment
680–1,120

In the home office, as a lectern, for the coffee break or in the training room – REISS Trailo® One always looks impressive.
