

REISS Standard  
The timeless classic.

We know how to create offices.

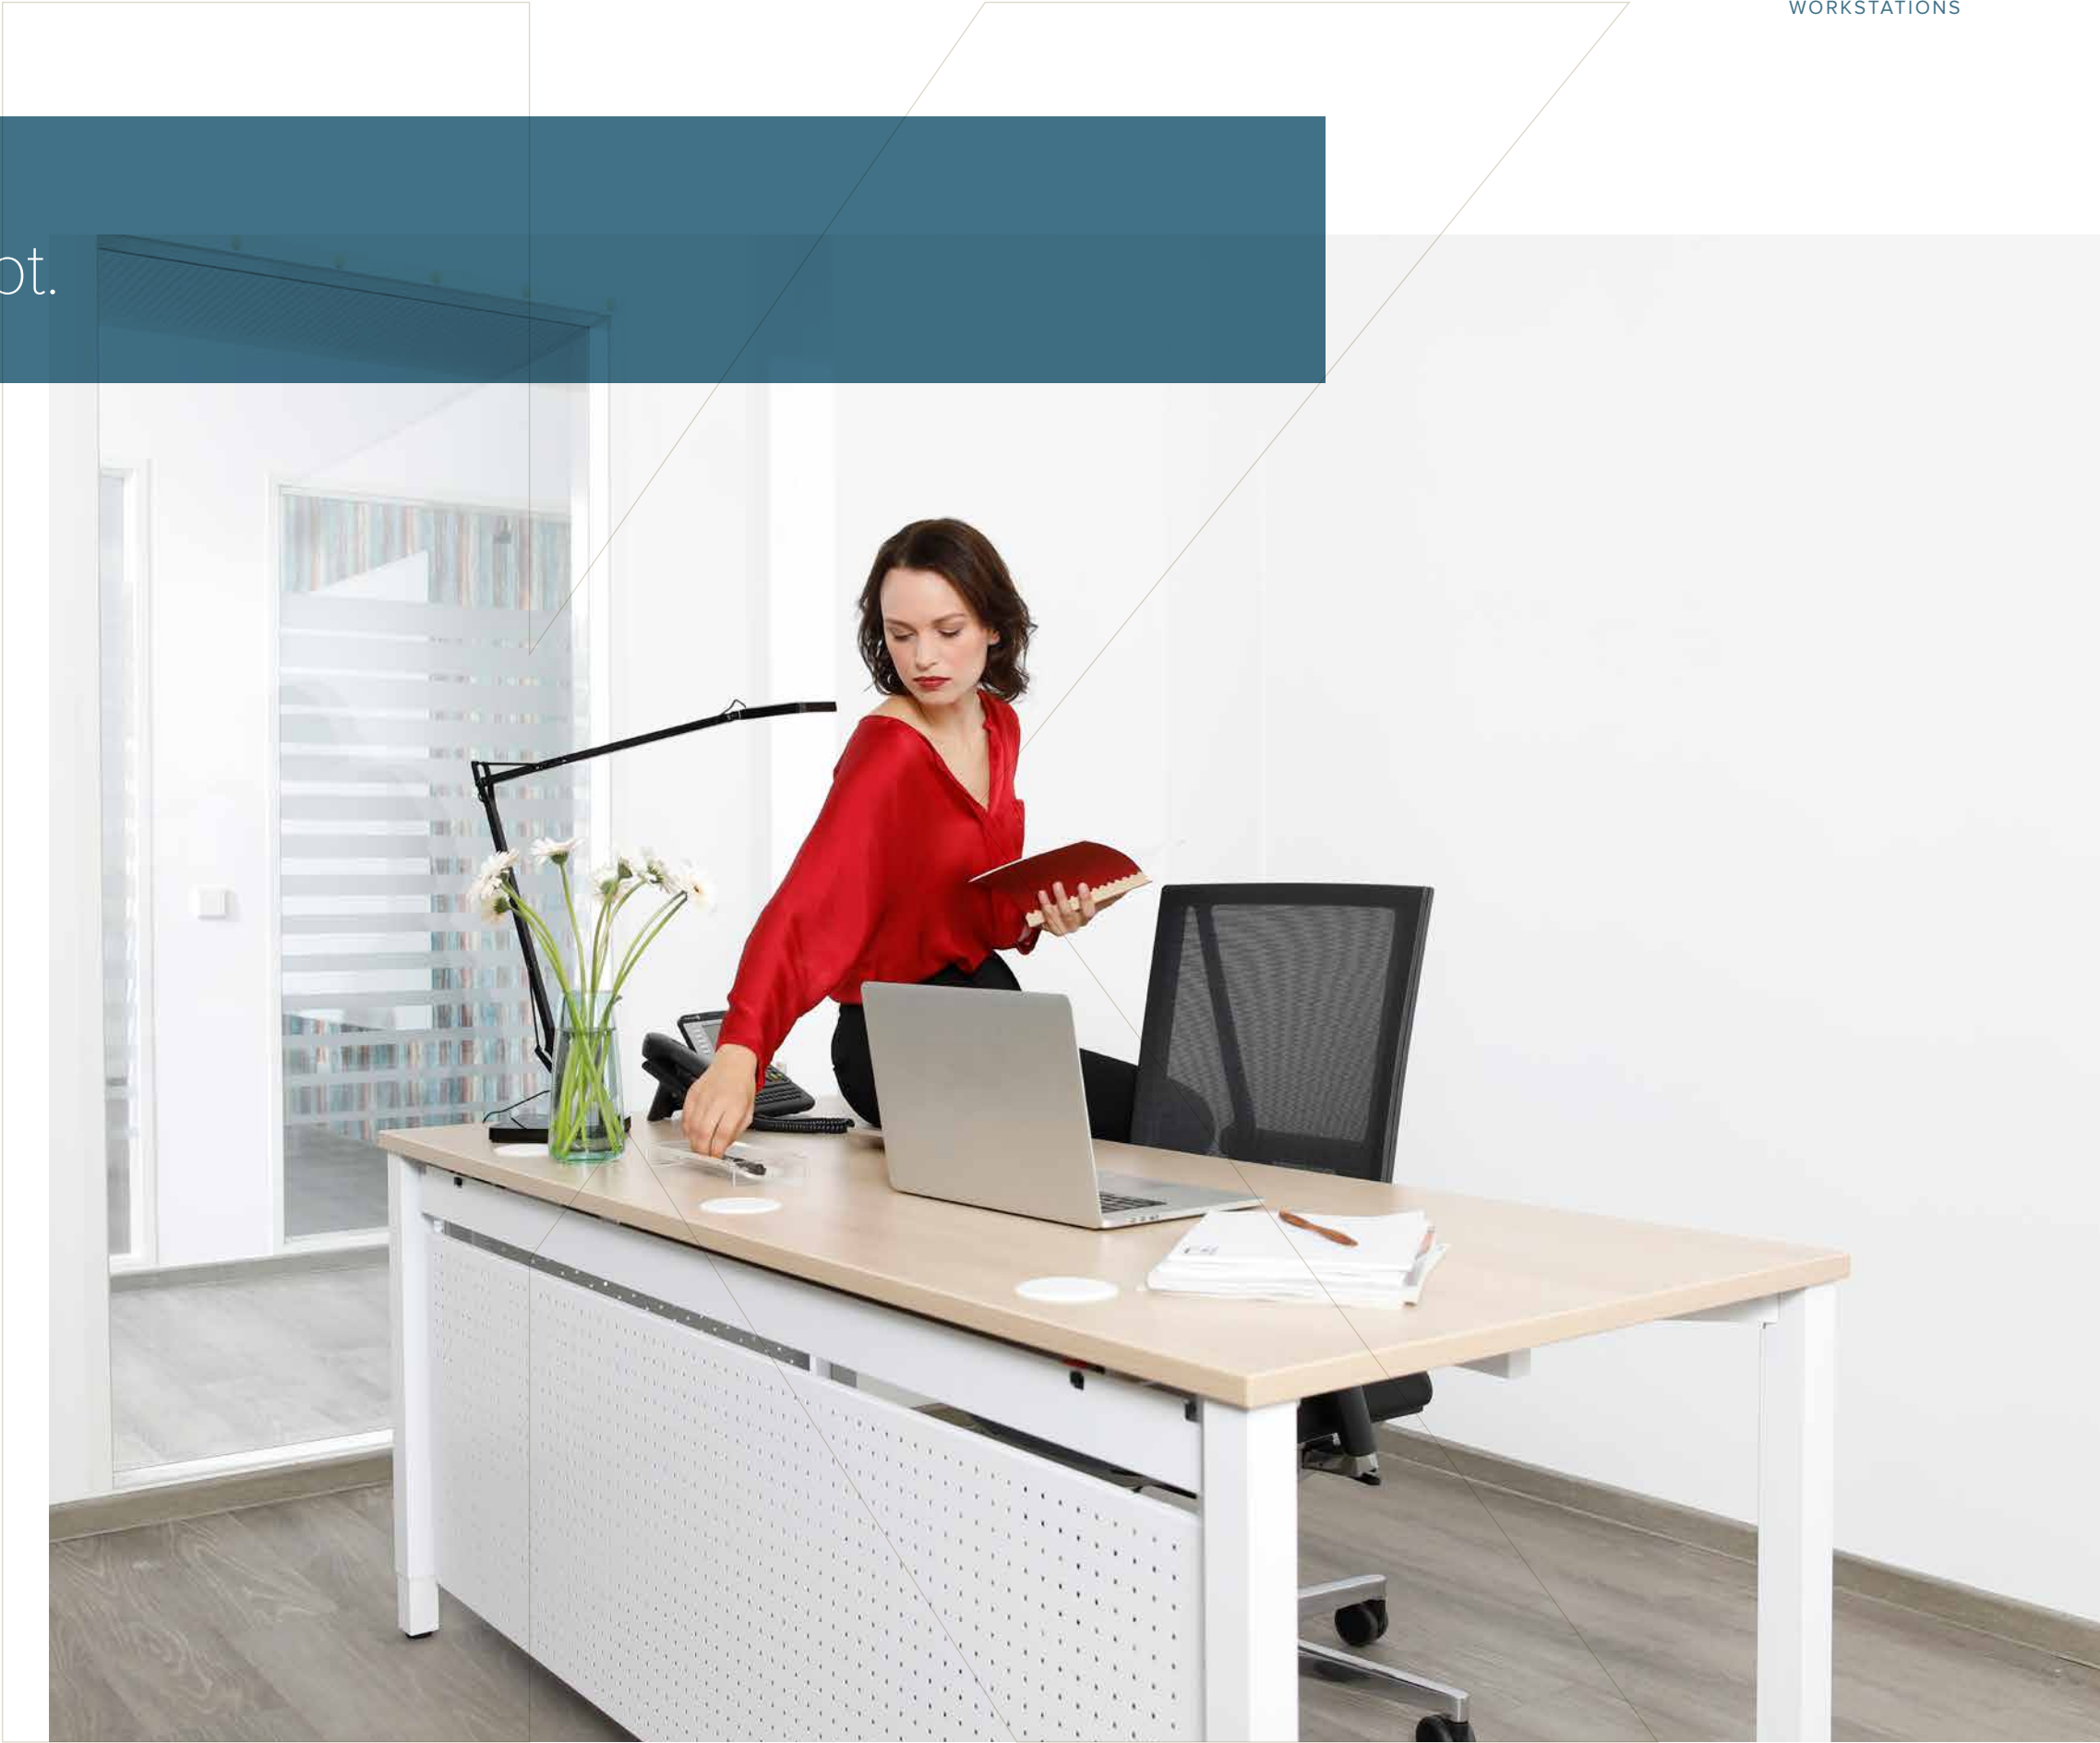

# Straightforward concept.

Fully relevant to the function, REISS Standard provides all essentials for a modern workplace, without thereby thrusting into the foreground. Clear structures, free space to work and options for individual configuration belong to REISS, just as the standard. Just like quality and service.

## HIGHLIGHTS AND OPTIONS

- | Hight stability thanks to the 20 table top pad
- | Easy handlings thanks to low-tool installation
- | Sliding plate function for optimal electrification
- | Legroom and side screen height adjustable

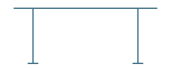

## The timeless classic.

Concentration on the essentials. A slim frame and a square cross-section are characteristics of the REISS Standard. A desk that has already proven itself in every office situation, because nothing here distracts from the work task. And certainly not the price.

The functionality and straightforward design for storage furniture and shelves expand further with REISS Standard. The desk with slim frame excellently integrates itself and the dual workplace appears very homogenous. A continuous change of decoration underlines this impression.

## Relaxed decision maker.

The large cross-section of the REISS-VV frame supports the representative appearance of the desk. In addition to various colours, the frame can also be constructed in chrome. The height adjustment with telescopic guide, tube-in-tube, always provides a relaxed working posture.

The simplest solutions are often the best. Whether an individual workplace or teamwork, combined with the REISS cupboard system, you will get enough creative free space for generous and quick realisation of workplace layout.

# Functional efficiency.

REISS Standard-RR draws on the combination of round and straight shapes, without losing the clarity of the optical appearance. The corner desk looks especially harmonious. Thank to the height adjustment, it is adequate for every work situation. Supplemented by the REISS cupboard and container system, even the small areas are transferred into attractive workplaces.

Those who place value on individuality and generous workplace layout, will feel very comfortable with REISS Standard-RH. The ergonomic table top design, in combination with side containers, not only provide more working space, but give the single or dual workplace an elegant, modern appearance.

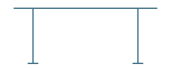

## Variable use.

One of the strengths of REISS Standard is its versatile applicability. The various shapes of table tops permit comprehensive application in companies, as well as furnishing waiting areas in public rooms, like in hospitals.

Whether with circular or trapezoidal table tops, REISS Standard always has the right frame, enabling harmonious communication on any scale.

# Communicative Center.

Communication interfaces become increasingly important in a company today. REISS Standard provides an ageless solution in many forms. Here is sufficient space for the exchange of thoughts and ideas in larger discussion groups or the spontaneous meeting.

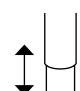

REISS Standard V74, with square frame and connection plates, makes large tables look truly chic. This conference table creates a tidy working environment and lots of space for discussions.

# Model overview
