

My smartphone, my tablet
computer, my laptop... my REISS

REISS Touch – Ergonomics rethought.

- ▮ Simply swipe and adjust the desk to the optimum working height.
- ▮ Simply work for your health and switch between standing and sitting with one swipe.
- ▮ Simply have fun at the workplace with modern technologies and the progressive solutions from REISS.

We know how to create offices.

REISS

 Swipe to move

More ergonomics with a single swipe.

Stand-sit desks are the key to an ergonomic workplace. With REISS Touch, height adjustment and the health-promoting alternation between sitting and standing activities take on a whole new dimension. The modern way of height adjustment for stand-sit desks is inspired by the use of the smartphone – one swipe and you adjust your desk to the optimal working height while sitting, standing or for a short meeting.

The operation is sensor-based and controlled directly on the table top.

Please click here to watch a video about the operation <https://www.youtube.com/watch?v=ZtCLtTOB59M> or scan QR Code.

Moving the table upwards
Swipe to the **right** and press

Moving the table downwards
Swipe to the **left** and press

REISS Touch is available for the REISS Avaro Q and R stand-sit desks and the REISS Avaro Q Bench double workstation.
