

REISS Büromöbel GmbH
Motivating working worlds.

We know how to create offices.

A trendsetter
for new ideas.

More than 100 years ago we made industrial history with the legendary board. Generations of architects, designers and pioneers used the world's first ergonomically adjustable drafting machine to realise ideas and change the world.

We will continue this tradition in the future. As a trendsetter for new ideas, we design and produce high-quality office furniture systems for working environments in which people are able to develop their full potential and achieve their goals.

Countless cities have been designed and planned on the REISS board. Chandigarh in India, for instance. The planning drafts originate from the influential Swiss architect and urban planner, Le Corbusier. The foundation stone of today's megacity was laid in 1957.

Good ideas.
You are most welcome.

Change is the only constant phenomenon of our time. This also applies to REISS.
Ever since our foundation in 1882, we have been evolving from a mail-order
business for measurement supplies to a leader office furniture producer in
Germany and Europe.

We have retained one thing
over all these years: the drive
to understand your
challenges and and to
develop solutions
for intelligent workplace
concepts that can be flexibly
adapted to your needs,
motivate you and promote
your health. We know of only
one benchmark for this – you.

Live work.

Brainstorming in the lounge, concentration in the think tank,
in single and open offices or in the work space.

Today's working world has many facets.
And it is becoming more and more demanding.
Therefore, we develop and produce intelligent
office furniture systems which can be transformed
into functional places for teamwork, communication
and concentration in no time at all.

These include individual or group workstations,
ergonomic stand-sit-desks as well as desks
screens for privacy and acoustic walls which
minimise disturbing noise emissions and create
variable room structures.

We produce according to the
highest environmental standards
and ensure a sustainable supply
chain. 99 percent of our suppliers
are based in Germany.
One in four of them is less than
200 kilometres away from us.

More than 140 years of pioneering spirit.

Robert Reiss
Company founder
*1844 †1915

1882

Company founded by Robert Reiss as a mail-order business for measurement equipment and office supplies in Liebenwerda, Germany

1880

1890

Our products Solution-oriented.

„Made in Germany“ quality. We have been producing our solutions for modern office exclusively in Germany for over 100 years and will continue to do so in the future.

As an important economic factor and employer in Bad Liebenwerda and its surrounding, we actively take over regional responsibility.

In this way, we support children and young people in the fields of sports, culture and education. We offer young people a professional perspective and are guided by the principle of sustainability in everything we do.

Workstations

Practical, elegant, multifunctional and variable: with our workstations, you create performance- and health-promoting workspaces for the diverse demands of your employees.

- REISS Avaro Q
- REISS Eco N2
- REISS Idealo
- REISS Standard
- REISS Novo
- REISS SmartClean

Stand-Sit-Workstations

Over 100 years of stand-sit expertise, ergonomic functionality in perfection: bring more dynamism into your office with the height-adjustable desks from REISS.

- REISS Avaro Q / R / Basic
- REISS Avaro Q Bench
- REISS Eco V
- REISS Eco N2
- REISS Novo

Communication

Sharing knowledge, face-to-face: With our communication solutions you create the best conditions for successful meetings and good conversations.

- REISS Avaro Q
- REISS Standard
- REISS Eco N2
- REISS Novo
- REISS Idealo
- REISS Tabilo
- REISS Inteo

Storage

Order and structure: everything finds its place in our modular storage solutions - on the wall, at the desk or as a structural element in the middle of the room.

- REISS Storage space
- REISS Container
- REISS Plant container

Acoustic

Concentrate on the essentials: Minimise disturbing sound emissions with our acoustic solutions and create variable room structures with a feel-good ambience.

- REISS Calo 42
- REISS Calo 22
- REISS Acoustic

Workstations. Functionality, comfort and ergonomics

Practical, functional and variable: Our system solutions provide you with workstations which promote performance and health for the diverse demands of your employees.

Use a variety of combination options for a functional interior design

Stand-sit-workstations. More dynamics in Offices.

Our stand-sit-desks meet all ergonomic requirements for a contemporary knowledge workstation.

Thanks to the quick lift, crank lever or motorised adjustment, you and your employees can work safely and comfortably at any height. Stand-sit-desks from REISS provide the highest quality and ergonomic functionality, as well as greater variety and freedom of movement.

COMMUNICATION

Our communication solutions integrate intelligent cable management for easy connection to projectors, computers, tablets and other peripheral devices.

Face-to-face communication is complex. Our communication solutions put everything on the right level. From specialised conference and seminar rooms, highly variable conference zones up to prestigious conferences - no questions are left unanswered.

Communication. Distinctly versatile.

STORAGE

Storage space.
Everything in
proper order.

Individually configurable with extensive interior fittings. Our storage systems flexibly provide for order. Having a modular design, they offer a variety of solutions for every office. They can be integrated visually and in a wide variety of ways into any office ambience.

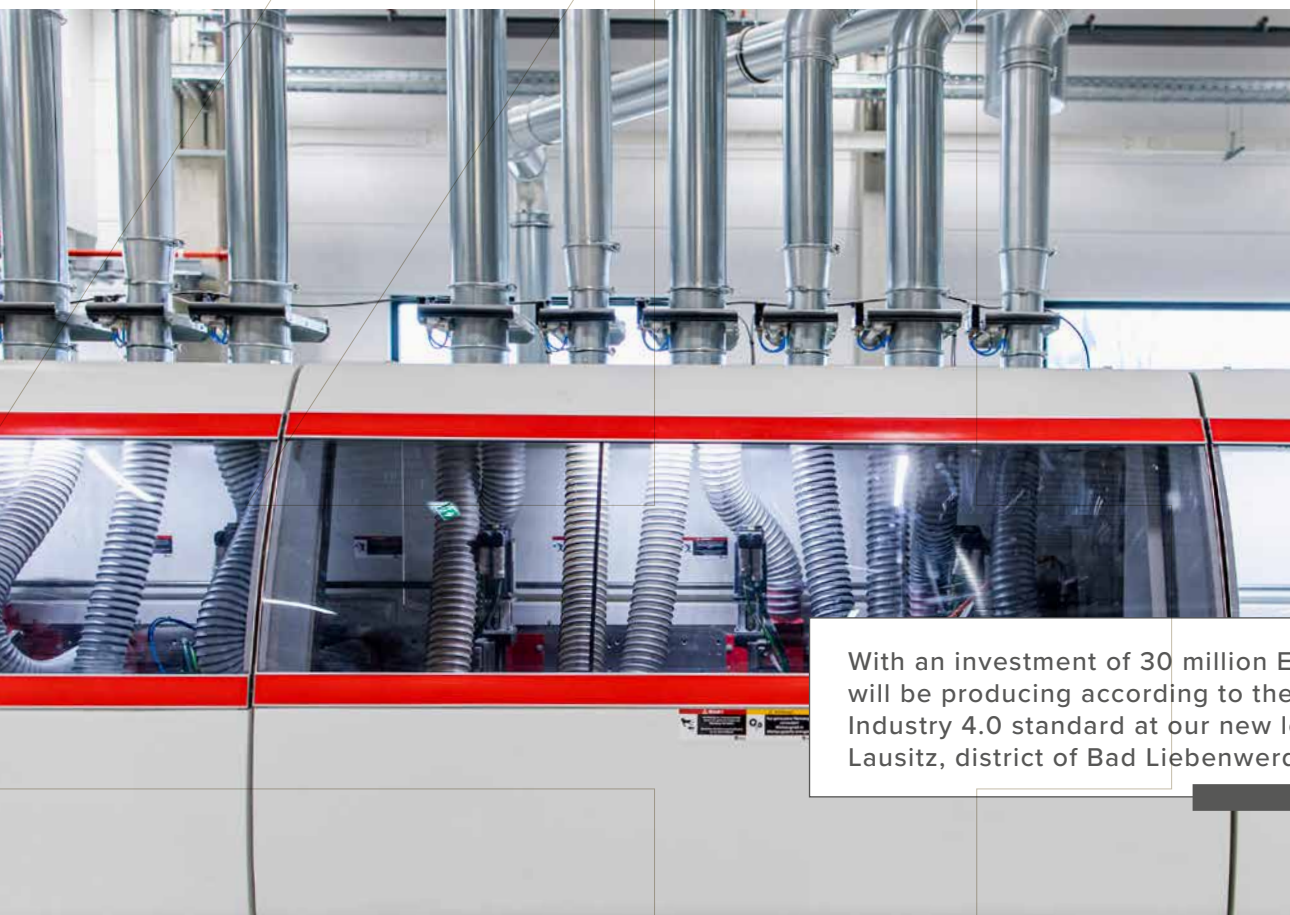

Acoustics. Strength lies in the calmness.

Our privacy protection and sound insulation systems are characterised by high sound absorption, low weight and simple installation. The noise-absorbing components can be easily attached to the REISS desks or workstations and in the storage area or set up as a standalone system in the room. At the right place, they permanently provide selective resting zones and room structures that can be flexibly adapted to changing requirements.

Process oriented production with modern standards

Thanks to state-of-the-art production facilities and a new ERP system, we process large orders just as efficiently and with the same high quality as custom-made projects.

With an investment of 30 million Euros, we will be producing according to the Industry 4.0 standard at our new location in Lausitz, district of Bad Liebenwerda

Networked machines and a highly flexible „batch size 1“ system on an area of 12,500 m²: With our new production site in Lausitz, district of Bad Liebenwerda, one of the most modern plants in the industry will start its production. This also applies to our metal processing operations, which will be based on the Industry 4.0 standard from 2022 onwards and will guarantee even more productivity and consistent quality.

Automated metal processing

The high degree of automation and powerful laser technology of our metal processing facility ensure maximum productivity without quality fluctuations and significantly reduced material and energy consumption. Our tube laser system ensures flexible processing of open and modular tubes in any batch size, for exact pre-cuts, while our CNC punching and nibbling machine guarantees metal products of the highest quality.

Perfect finish with solvent-free powder coating.

Powder coating gives our metal parts a surface that is unparalleled in terms of strength, corrosion protection and resistance. As a matter of course, we attach particular importance to sustainability in this process step as well. This enables us to achieve a powder utilisation rate of 99 percent, recover most of the energy used during heating and have solvent-free powder processing without environmentally harmful solvents and toxic heavy metals.

Woodworking with low-emission materials.

In our automated storage and cutting centre, we process wood materials such as melamine-coated, three-layer chipboard with the highest colour fidelity and lowest pollutant emissions. We use only natural materials from certified cultivation.

Parts are delivered to final assembly work stations/assembly lines in combination with the automatic warehouse system on the basis of the Kanban principle.

We are always at your side.
Personalised support ranging from
consulting to product briefing.

Well advised

In a joint meeting, the qualified REISS consultants, as well as over 300 specialist trade partners, will assess your requirements, and develop economical and sustainable solutions for workstations which promote performance and health.

Custom solutions

With our own construction department located in the headquarter in Bad Liebenwerda, we can flexibly and precisely implement our customers' individual requirements.

Careful planning

Our certified workstation experts know what is important when planning your workspaces, taking into account not only ergonomic factors but also labour law provisions and existing efficiency potentials in your work processes.

Responsible contact persons

We want your contact person to know what is important to you. That is why you can get in touch at any time with experienced REISS employees who will provide you with competent assistance.

Selected forwarding agents

To ensure that our office furniture reaches you safely and properly, we extend our quality management up to our partner forwarding agents. We carry out annual audits with all contracting partners and evaluate their overall performance on the basis of strict qualitative and ecological criteria.

Expertise from experts

High quality and excellent know-how go hand in hand. That is why all employees and partners are regularly trained in products, planning, installation and assembly.

Expert assembly and product briefing

Our office furniture is characterised by high functionality. That is why experienced expert fitters are on site to introduce your employees to the special features of the new furniture, which we deliver pre-assembled.

That is why planning and consulting, individual project management and competent customer service are all integral to the quality of REISS office furniture. Of course, we are there for you even after assembly and setup.

From a sense of responsibility for the future.

We focus on sustainable entrepreneurship, ecological product design and the responsible use of resources. We are committed to the present and future generations and want to preserve an intact habitat in a natural environment.

That is why we put all business processes and new investments to the ecological test. Our quality and environmental management system is certified according to ISO 9001 and ISO 14001. In addition, we were certified according to the criteria of the EU environmental guideline EMAS III in 2013 and also issued an environmental declaration.

REISS fulfils the guidelines outlined in the EMAS III criteria.
