Bad Liebenwerda, 23.05.2022

Information on the energy cost surcharge valid from 01.06.2022

Dear Ladies and Gentlemen

We re-evaluate the surcharge for energy costs based on the current situation. As there are no signs of an easing of the situation, the currently valid energy cost surcharge of 11.7% will remain in place until 31.08.2022. In August, we will define the surcharge from 01.09.2022 onwards based on ongoing developments.

The economic situation is currently not easy for all parties. Incalculable prices, limited availability of parts and the uncertainty on the buyer side are making business enormously difficult.

In order to enable you to act more competitively within the scope of projects, we have decided to reduce the energy cost surcharge to 6.9 % for new projects with a net offer value of € 15,000.00 or more that are realised in 2022. We hope that this will be of some help to you.

As before, the energy cost surcharge will be shown separately in the order confirmations.

If you have any questions, please do not hesitate to contact your REISS area sales manager or our internal sales team.

We thank you for the partnership and your trust.

Best regards

Michel Tulke
Head of Internal Sales
